Project Experience

Neighborhood Map – <https://github.com/jakegornall/NeighborhoodMapProject>

November 2016

- Created a client-side application that utilized Google Maps API and Yelp API.
- Users were able to search for new places, add/delete new places to/from a list as well as search places in the list, and access Yelp information upon request.
- Site was fully responsive and worked across all major browsers. Knockout.js was used as the MVVM framework.

Jacob Lones Website – <https://jacoblonesofficialsite.appspot.com>

November 2016

- Designed, created, and launched country artist, Jacob Lones, website.
- Site is fully responsive with a mobile menu for smaller screens.

Item Catalog Project – <https://github.com/jakegornall/ItemCatalogProject>

October 2016

- Created and launched full data driven web application.
- Application was launched on an Amazon web server using Apache, Flask, and Postgresql on a Linux Ubuntu machine.
- Users were capable of logging in with the Facebook API and they could create, read, update, and delete items from the Postgresql database .

My Portfolio Site – <http://jacobgornall.website>

December 2016

- Source Code: <https://github.com/jakegornall/JakePortfolioSite>
- Technologies: Python, Javascript, Knockout.js, JSGLue, jQuery, AWS Ubuntu, Apache.
